STANSLOUS NHAU

UX DESIGNER | UX RESEARCH | PRODUCT DESIGN & STRATEGY

Germiston, South Africa | +27 79 324 2444 | smnhau03@gmail.com | LinkedIn | Portfolio

PROFILE

UX Designer and Design Strategist with a BCom in Statistics and practical experience in UX research, product design and enterprise discovery. I connect qualitative research, analytical reasoning and systems thinking to frame complex problems and translate evidence into actionable experience decisions. My work spans stakeholder research for a Tier 1 African bank, fintech and rewards concepts, and design strategy at UluntuXD, including research synthesis, facilitation, user flows, prototyping and high-fidelity design in Figma.

EXPERIENCE

Design Strategist | UluntuXD | September 2026 – Present | 3-Month Internship

- Contribute to client and internal design-strategy initiatives by connecting research insights, business objectives and user needs to identify experience opportunities.
- Synthesise discovery findings into strategic recommendations, experience principles and design directions that support product and service decisions.
- Collaborate with designers, developers and stakeholders through discovery, ideation, workshops and concept development to bring structure to ambiguous problems.
- Facilitate UX research classes, helping learners engage with research methods and user-centred problem-solving.

SELECTED UX PROJECTS

Enterprise API Ecosystem Research | UX Researcher | Team of 7 | Tier 1 African Bank (NDA)

- Investigated barriers to API discoverability, reuse and cross-team collaboration across a large internal developer ecosystem.
- Designed the stakeholder interview protocol and independently conducted 9 of 16 interviews with solution architects, developers, designers and executives.
- Facilitated affinity mapping and contributed to cross-functional ideation, synthesising interview data into six themes for leadership discussion.
- Contributed to a machine-to-organism reframe, broadening the proposed response beyond tooling to consider culture, incentives, ownership and collaboration.

Velocity Rewards | MVP Concept | Individual Contributor | Figma

- Designed a concept for a cashless, card-agnostic fuel-retail rewards experience for Johannesburg motorists, including digital tipping.
- Audited six fuel-retail and banking loyalty programmes to identify patterns in reward visibility, flexibility and redemption.
- Translated the audit and research into three behavioural archetypes and four product hypotheses, then defined MVP priorities and a success model focused on repeat engagement and meaningful reward use.
- Designed 32 end-to-end Figma screens across onboarding, rewards tracking, redemption, withdrawal and digital tipping, supported by a consistent visual design system.

RISE | Real Income, Steady Earnings | Individual Contributor | Fintech Design Exploration

- Used national youth-employment and financial-wellbeing research to frame a concept addressing financial pressure among first-time young earners in South Africa.
- Synthesised the research into a clearly labelled composite persona and mapped a payday-to-payday behavioural loop to identify potential intervention points.
- Defined five product decisions—including a protected Buffer balance, predictive low-balance warnings and a judgement-free help channel—and documented conventional patterns considered and rejected.
- Designed onboarding, home and alerting experiences in Figma, using a calm visual and interaction approach intended to reduce cognitive load.

SKILLS

UX Research & Strategy: User Interviews, Stakeholder Research, Research Planning, Affinity Mapping, Research Synthesis, Heuristic Reviews, Workshop Facilitation
Product & Interaction Design: User Flows, Information Architecture, Wireframing, Prototyping, High-Fidelity UI, Interaction Design, Design Systems
Tools & Analysis: Figma, R, Basic SQL, Power BI (Basic), Microsoft Office, Quantitative and Qualitative Analysis
Ways of Working: Design Thinking, Human-Centred Design, Agile and Waterfall, Presentation and Collaboration

TRAINING & EDUCATION

UX/UI Design Program | UluntuXD | Completed August 2026 — Practical end-to-end UX training in research, synthesis, wireframing, prototyping, usability testing and interface design through real-world briefs in Figma.
Bachelor of Commerce, Statistics | Nelson Mandela University | 2022–2025 — Relevant coursework: Advanced Data Analysis, Time Series Analysis, Financial and Strategic Management.
